

# How do I use my own favicon.ico or robots.txt?

---

The default favicon.ico and robots.txt files of Daisy can be found at

```
<DAISY_HOME>/daisywiki/webapp/daisy/resources/
```

If you want to modify them, **do not overwrite these files**, as these changes will be lost when upgrading Daisy. Rather, put your own files in:

```
<wiki data directory>/resources/
```

If the files are found there, they will take precedence over those below DAISY\_HOME.
